

AKSHAY ATREYA

Houston, TX, USA | +1 (281)-638-2898 | akshay.atreya824@gmail.com | www.linkedin.com/in/akshayatreya/

SUMMARY

BIM / VDC Engineer with experience delivering **BIM coordination, model-based coordination, clash detection and resolution**, and constructability analysis across **50+ commercial construction projects**. Advanced proficiency in **Revit (LOD 300-400), Navisworks Manage, and Autodesk Construction Cloud**, and interdisciplinary coordination, **issue tracking, and digital workflows**. Skilled in **3D/4D BIM modelling and integration with Primavera P6**, enabling improved sequencing and schedule validation. Proven ability to reduced rework, **improved model accuracy, and streamlined coordination across architectural, structural, and MEP systems**.

EDUCATION

University of Houston, Houston, TX

Masters of Science in Construction Management

Aug'24 - May'26

GPA: 3.9/4

Visveswaraya Technological University

Bachelors in Architecture

Jun'17- Jul'22

GPA: 3.38/4

SKILLS

BIM / VDC Coordination & Digital Construction: BIM Coordination, Clash Detection & Resolution, Constructability Analysis, Model-Based Coordination, Interdisciplinary Coordination, RFI & Submittal Management, Work Sequencing, Model-Based Field Verification.

BIM, Drafting & Technical Tools: Revit (LOD 300-400), Navisworks Manage, Autodesk Construction Cloud (ACC), AutoCAD, Bluebeam

Project Controls & Reporting: Primavera P6, Microsoft Office (Excel, Word, PowerPoint, Teams), Progress Monitoring

Visualization & Modelling Support: SketchUp, Lumion, Enscape, Twinmotion, Photoshop, InDesign.

WORK EXPERIENCE

1. Graduate Assistant | Team Lead

University of Houston

Sept'25 - Jan'26

Houston, TX, USA

- Managed testing operations, scheduling, and verification while streamlining check-in/check-out for secure, efficient execution.
- Oversaw cross-functional collaboration with faculty and administrative teams to implement process optimizations, reducing check-in and inquiry handling time by 50%.

2. VDC Engineer

SKS infrastructures

May'23 - Aug'24

Bangalore, IND

- Led BIM coordination and model federation across 50+ projects, aligning architectural, structural, and MEP systems to support clash-free execution and project timelines.
- Performed clash detection and constructability analysis using Revit and Navisworks Manage, resolving coordination issues pre-installation and reducing rework by 20%.
- Leveraged Navisworks models to validate field conditions and material installation across 30 projects, identifying issues early and speeding up project close-outs.
- Facilitated weekly BIM coordination meetings with contractors and consultants, managing issue tracking and improving sequencing to support on-schedule execution across 80% of project phases.
- Administered RFIs, submittals, and shop drawings through Autodesk Construction Cloud (ACC), ensuring efficient workflows, version control, and timely approvals.
- Developed and monitored multiple construction schedules using Primavera P6 with critical-path and look-ahead planning, keeping projects on track and reducing schedule delays.

3. Architect | BIM & Digital Construction

Studio-68 Architects

Feb'22 - Mar'23

Bangalore, IND

- Executed delivery of K-12 educational facility projects through Revit-based constructability reviews and coordinated documentation, reducing execution delays by 15%.
- Developed construction-ready AutoCAD and Revit models and drawings, minimizing errors and improving field installation efficiency.
- Facilitated VDC-driven site inspections with engineers, contractors, and trade teams to monitor installation progress, quality, & safety compliance, ensuring issues were identified early through model coordination and corrective actions-maintained schedule alignment.
- Conducted model-based site inspections and field verification, validating installation progress, quality, and safety compliance against BIM models.

4. Architectural Intern

Studio-68 Architects

Oct'21- Feb'22

Bangalore, IND

- Spearheaded design and construction workflows through AutoCAD and Revit documentation, progress reporting, and helping teams deliver milestones on time while significantly cutting down revision cycles.
- Developed detailed construction drawings using AutoCAD, improving drawing accuracy and supporting efficient field execution.

LICENSES

- **COUNCIL of ARCHITECTURE - INDIA** - CA/2023/159400
