Michael.freda25@gmail.com

Education

Iowa State University
BS in Industrial Engineering

Skills

AutoCAD
Revit
Inventor
Simio
PowerBI
Microsoft Project
SAP
Maximo
Microsoft Office
Time Studies
Root Cause Analysis
Cycle / TAKT Time
Material Flow
Capacity Analysis
Line Balancing
Inventory Management
Cost Reduction
Data Analysis

Project Industries

Aerospace
Cargo
Automotive
Lithium Ion Battery
Government

Experience

Boeing – Industrial Engineer

July 2025 – Present

- Oversee all industrial engineering related activities for 7 F-18 part assemblies of which include: KPI's, cycle time, TAKT time, line balancing, lead time analysis, schedule optimization and visualization, recovery planning, capacity analysis, layout design, root cause analysis, and lead any optimization or cost reduction projects
- Coordinate and lead movement of assemblies within building without impacting production
- Work with other programs and construction management to create and implement schedule
- Create business cases for improvements to assemblies, facilities, and production throughput

Ghafari Associates – Industrial Engineer

January 2023 – July 2025

- Lead projects and dealt directly with clients
- Work with architects to create new facility design for automotive plants, lithium ion battery production facilities, government manufacturing and airline cargo
- Lead material flow and inventory management projects for multiple clients
- Process design and layout design for part sequencing operation of 32 parts for automotive application
- Multiple new construction projects dealing with facility startup, construction management assistance, including onsite support

Clarios – Industrial Engineering Intern

June 2021 – September 2022

- Worked full time while finishing my degree part time
- Built new data analytic tools in Power BI for all plants across US combining data from SAP, Maximo, and internal systems to create effective KPI's
- Conducted time studies, capacity analysis, material flow, and general process improvement studies for multiple plants
