

MANI DILEEP REDDY PENTHALA

manipenthala91@gmail.com | (620)-719-9145 | USA | LinkedIn

Summary

Construction professional with 3+ years of experience in residential, commercial, and large-scale infrastructure projects. Skilled in project management, site inspections, quality assurance, and construction coordination, ensuring compliance with codes, safety standards, and schedules. Proficient in design review, documentation, and collaborative team leadership. Experienced with a wide range of construction tools and technologies, driving efficient workflows, risk mitigation, and timely delivery while maintaining high-quality standards across multidisciplinary projects.

Technical Skills

- **Construction Management & Planning:** Project Management, Jobsite Planning, Pre-construction, Budgeting, Cost Analysis, Bid Proposals, Quantity Takeoff, Risk Management, Project Scheduling, Lookahead Planning, Critical Path Method (CPM) Scheduling, Procurement Management
- **Design, Drafting & Modeling:** AutoCAD, Revit (Structural), SketchUp, Staad-Pro, BIM 360, Navisworks (Basic), Redline Drawings
- **Documentation & Reporting:** Daily Reports, RFIs, Construction Submittals, Inspection Records, Meeting Minutes, Safety Checklists, Manpower Logs, Bluebeam, Microsoft Suite
- **Coordination & Leadership:** Subcontractor Management, Design Coordination, Issue Tracking, Progress Monitoring, Change Management, Collaborative Problem Solving, Effective Communication, Coordination, Team Leadership, Organizational Skills, Stakeholder Coordination, Weekly Progress Reporting, Cross-functional Team Meetings
- **Quality & Safety Assurance:** Site Inspections, Punch List Closures, Quality Control Checklist

Certifications

Occupational Safety and Health Administration (OSHA 30) | PROCORE Student | Construction Manager-In-Training (CMIT) | AutoCAD | ACI Certified | MoDOT Certified | Nuclear Gauge USDOT

Professional Experience

Construction Engineer, Terracon

09/2025 – Present | Hybrid, USA

- Supported diverse construction engineering activities, including detailed site inspections, field coordination, and quality control, improving on-site compliance by 15% while ensuring adherence to project timelines, safety requirements, and engineering standards across large-scale projects.
- Assisted in reviewing construction drawings, specifications, and submittals, identifying potential errors and ensuring 98% compliance with engineering standards, codes, and project requirements, providing timely feedback that optimized design execution and prevented costly on-site issues.
- Coordinated with contractors, project managers, and multidisciplinary teams to resolve technical challenges, streamline construction progress and keep detailed documentation, contributing to successful delivery of major developments, including the QTS Data Center, one of Iowa's largest projects.

Construction Inspector, Certerra Rone Engineering

03/2025 – 09/2025 | KS, USA

- Conducted field inspections and material testing on soil, concrete, and asphalt, ensuring 98% compliance with ASTM, ACI, and project specifications, maintaining construction quality, reducing rework, and supporting timely completion across all commercial projects.
- Monitored construction sites for safety practices and building code adherence, achieving a 95% on-time project milestone rate, coordinating with contractors and project managers, mitigating risks, and enhancing overall site efficiency while maintaining high-quality workmanship.
- Prepared detailed daily inspection reports for multiple commercial projects, including Americold Storage Building, Swig Building, Child Development Center, and Advance Health Parking Garage, ensuring structural integrity, material compliance, and transparent communication with project stakeholders and management teams.

Assistant Construction Engineer, American Engineering and Testing, Inc.

05/2024 – 08/2024 | MN, USA

- Assisted in managing multi-million-dollar construction projects, coordinating site operations, materials testing, and quality control, ensuring adherence to engineering specifications, building codes, and safety standards while supporting budget tracking and progress reporting.
- Collaborated with project managers to monitor schedules, implement risk mitigation strategies, and optimize construction workflows, contributing to timely project completion, cost efficiency, and compliance with client requirements, industry standards, and environmental regulations.

Construction Engineer/Manager, Megha Engineering & Infrastructures Limited (MEIL)

01/2022 – 08/2023 | A.P, India

- Directed execution of 8-floor residential and commercial complex spanning 500000 square feet, ensuring MEIL standards, approved designs, strict schedule adherence, cost control saving ₹2.1 crore, stakeholder alignment, and seamless site operations throughout phases.
- Coordinated architectural, structural, and MEP drawings, resolved design clashes early, streamlined communication among consultants, contractors, and on-site teams, minimizing rework, improving design clarity, and enhancing collaboration for construction sequences daily execution effectiveness.
- Supervised civil works including RCC foundations, structural framing, internal finishes and utilities, managed skilled workers and subcontractors, ensured workflow continuity, achieved 30-day ahead milestone delivery, and upheld safety and quality benchmarks standards.
- Conducted detailed site inspections and quality audits for 72 checkpoints weekly, verified material compliance against BIS and project specifications, identified technical challenges early, implemented corrective measures, maintaining consistent construction quality baseline ensuring excellence.
- Led coordination meetings, monitored 12-week schedules, assessed risks, optimized manpower and machinery allocation, facilitated daily cross-team communication, recorded productivity improvements, and solved constraints to deliver key construction milestones on time with proactive leadership.
- Managed comprehensive documentation including RFIs, daily reports, inspection logs and contractual records, analyzed design revisions and schedule impacts, ensured transparent communication among 10 stakeholder groups and aligned actions for project success delivery excellence.

Education

Master of Science in Construction Management
Pittsburg State University, Pittsburg, Kansas, USA

08/2023 – 12/2024

Bachelor of Technology in Civil Engineering
KKR & KSR Institute of Technology and Sciences, Guntur, Andhra Pradesh, India

08/2019 – 05/2023

Projects

Designing an Isolated Fixed-Time Traffic Signal System for Guntur Junctions

- The project develops pre-set traffic signal phases based on peak-hour traffic analysis, optimizing vehicle flow, reducing congestion, ensuring pedestrian safety, enhancing junction efficiency, and improving overall traffic management while strictly adhering to local traffic regulations and standards.
